PROFESSIONAL SUMMARY

Technically inclined IT professional with 6+ years of experience across system administration, deployment automation, cloud infrastructure (AWS), and quality control. Skilled in Bash/Python scripting, Linux/Windows environments, and containerized deployments (Docker, NVIDIA-Docker). Proven track record of simplifying complex workflows, improving deployment reliability, and delivering SLA-driven technical support across time zones. Seeking to grow into a DevOps / Cloud Infrastructure role.

EXPERIENCE

Quidich Innovation Labs Ltd., Andheri, Mumbai

Apr 2024 - Present

Technical Support Engineer 2

- Managed Windows/Linux production environments for Dev and IT teams, maintaining 99% uptime across 60+ servers.
- Built Bash and Python automation scripts for system setup and software deployment, reducing manual deployment time by 40% per release.
- Configured and maintained production machines with NVIDIA-Docker, MongoDB, and Python environments to support concurrent projects and pipelines.
- Authored SOPs and simplified technical documentation, reducing onboarding and troubleshooting time for technical and non-technical teams.
- Performed end-to-end QC testing prior to releases, reducing post-deployment defects and rollbacks by 60%.
- Delivered SLA-based technical support across multiple time zones, maintaining 90% SLA compliance for uninterrupted operations.

Elevate-K12, Andheri, Mumbai

Oct 2021 - Apr 2024

Technical Support Engineer 2

- Administered AWS-hosted media servers on Ubuntu, ensuring 90% uptime through proactive monitoring and routine maintenance.
- Analyzed server logs via PuTTY/WinSCP to diagnose and resolve issues, improving server reliability and reducing recurring incidents.
- Wrote and optimized SQL queries for daily reporting, supporting performance tracking across datasets and dashboards.
- Handled client support via chat, email, and remote tools for 250+ tickets/month; contributed to UAT and QA testing cycles ahead of releases.

Impact Infotech Pvt. Ltd., Goregaon, Mumbai

Nov 2018 - Oct 2021

Desktop Support Engineer

- Installed, configured, and maintained Windows 10 systems including domain integration and OS updates for 500+ endpoints.
- Delivered desktop software support and coordinated with hardware vendors to resolve issues, minimizing downtime.
- Monitored and supported basic network connectivity, escalating advanced issues to specialized teams as needed.
- Maintained IT asset tracking, ensuring compliance with licensing and warranty requirements across the organization.
- Mentored and guided junior support staff, promoting knowledge sharing and reducing ramp-up time for new hires.

EDUCATION

B.Sc. Information Technology | Mumbai University | June 2023 | GPA: 8.6 / 10

CORE SKILLS

- Cloud & Infrastructure: AWS (EC2, VPC, CloudWatch, Networking), Docker, NVIDIA-Docker
- OS Administration: Linux (Ubuntu Server), Windows 10 / Windows Server, Active Directory basics
- Automation & Scripting: Python, Bash, process automation, SOP development
- Databases: SQL (query writing & optimization), MongoDB
- Tools & Monitoring: PuTTY, WinSCP, CloudWatch, log analysis & troubleshooting
- Support Operations: SLA-based ticketing, UAT/QA testing, cross-time-zone client support
