# DHANANJAY TRIPATHI

**Technical Application Support Engineer | Cloud Engineer | DevOps Engineer**

Naigaon East, Mumbai, India | +91-9867139508 | dhananjay.tripathi9799@gmail.com | LinkedIn | GitHub | Portfolio: https://dhananjay-git99.github.io

## PROFESSIONAL SUMMARY

IT professional with 7+ years in system administration, cloud infrastructure (AWS and Microsoft Azure), deployment automation and technical operations. Skilled in Linux and Windows administration, Bash and Python scripting, Docker containerization, and core cloud services (EC2, VPC, IAM, S3, CloudWatch, Azure VMs, VNet, RBAC, Azure Monitor), with Azure DevOps Boards, Repos and Pipelines for CI/CD. Proven record of automating deployments, maintaining up to 99% uptime, and reducing manual deployment effort by 40%. Seeking a Technical Application Support Engineer role.

## CORE COMPETENCIES

**Systems Administration:** Linux (Ubuntu Server), Windows Server / Windows 10, Active Directory, IIS, access management, OS patching, system troubleshooting
**Cloud:** AWS (EC2, VPC, IAM, S3, CloudWatch) and Microsoft Azure (VMs, VNet, RBAC, Azure Monitor, Log Analytics), networking, monitoring and alerting
**DevOps and Automation:** Azure DevOps (Boards, Repos, Pipelines), Bash, Python, Docker, CI/CD, deployment automation, Git / GitHub
**Support Operations:** Incident triage, root cause analysis, change control, release validation, runbook and SOP development, SLA-based ticketing (ITSM), UAT / QA, cross-time-zone support
**Databases:** SQL (query writing and optimization, reporting), MongoDB

## PROFESSIONAL EXPERIENCE

**Quidich Innovation Labs Ltd. — Mumbai, India**
*Technical Support Engineer 2 | Apr 2024 - Present*

- Administer Windows and Linux production environments for Dev and IT teams, maintaining 99% uptime across 60+ servers.
- Built Bash and Python automation scripts for system setup and software deployment, reducing manual deployment time by 40% per release.
- Deploy and maintain containerized workloads using Docker and NVIDIA-Docker to support concurrent projects and pipelines.
- Support MongoDB and Python runtime environments for production pipelines.
- Monitor system health and analyze logs to resolve incidents proactively and minimize downtime.
- Authored runbooks, SOPs and technical documentation, reducing onboarding and troubleshooting time for technical and non-technical teams.
- Performed end-to-end QC testing before releases to support controlled promotion across environments, reducing post-deployment defects and rollbacks by 60%.
- Delivered SLA-based technical support across multiple time zones, maintaining 90% SLA compliance.

**Elevate-K12 — Mumbai, India**
*Technical Support Engineer 2 | Oct 2021 - Apr 2024*

- Administered AWS-hosted media servers on Ubuntu, maintaining 90% uptime through proactive monitoring and routine maintenance.
- Diagnosed and resolved server issues through log analysis and root cause analysis, implementing permanent fixes that improved reliability and reduced recurring incidents.
- Wrote and optimized SQL queries for daily reporting and performance dashboards.
- Handled 250+ client support tickets per month via chat, email, and remote tools; contributed to UAT and QA testing cycles.

**Impact Infotech Pvt. Ltd. — Mumbai, India**
*Desktop Support Engineer | Nov 2018 - Oct 2021*

- Installed, configured, and maintained Windows 10 systems, including domain integration and OS patching for 500+ endpoints.
- Delivered desktop software support and coordinated with hardware vendors to minimize downtime.
- Monitored and supported network connectivity, escalating advanced issues to specialized teams.
- Maintained IT asset tracking and software licensing records, ensuring compliance with licensing, audit and warranty requirements.
- Mentored junior support staff, promoting knowledge sharing and reducing ramp-up time.

## EDUCATION

**B.Sc. Information Technology** — Mumbai University | June 2023 | GPA: 8.6 / 10

## CERTIFICATIONS & TRAINING

- Microsoft Certified: Azure Fundamentals (AZ-900) — in progress

## TECHNICAL SKILLS

Windows Server | Active Directory | IIS | Linux | Azure (VMs, VNet, RBAC, Azure Monitor, Log Analytics) | Azure DevOps (Boards, Repos, Pipelines) | AWS (EC2, VPC, IAM, S3, CloudWatch) | Bash | Python | Docker | MongoDB | SQL | Git | GitHub | CI/CD | Deployment Automation | Monitoring & Logging | SLA / ITSM | UAT / QA
